Augmented Reality - Research

● Function:

Eg. In the tourism industry, visitors can use AR technology to explore route and learn about relevant scenic spots, such as data, etc

● Application: App(Usual):

How to buid an AR technology work?
To buid an AR app

● Hardware components:

Processor+display +Sensors+input devices

Eg: smartphones, tablet computer

● Software and algorithms:

1. **image registration**

2. **video tracking**

● How AR works?

For example
